

How to initialize your Imou camera?

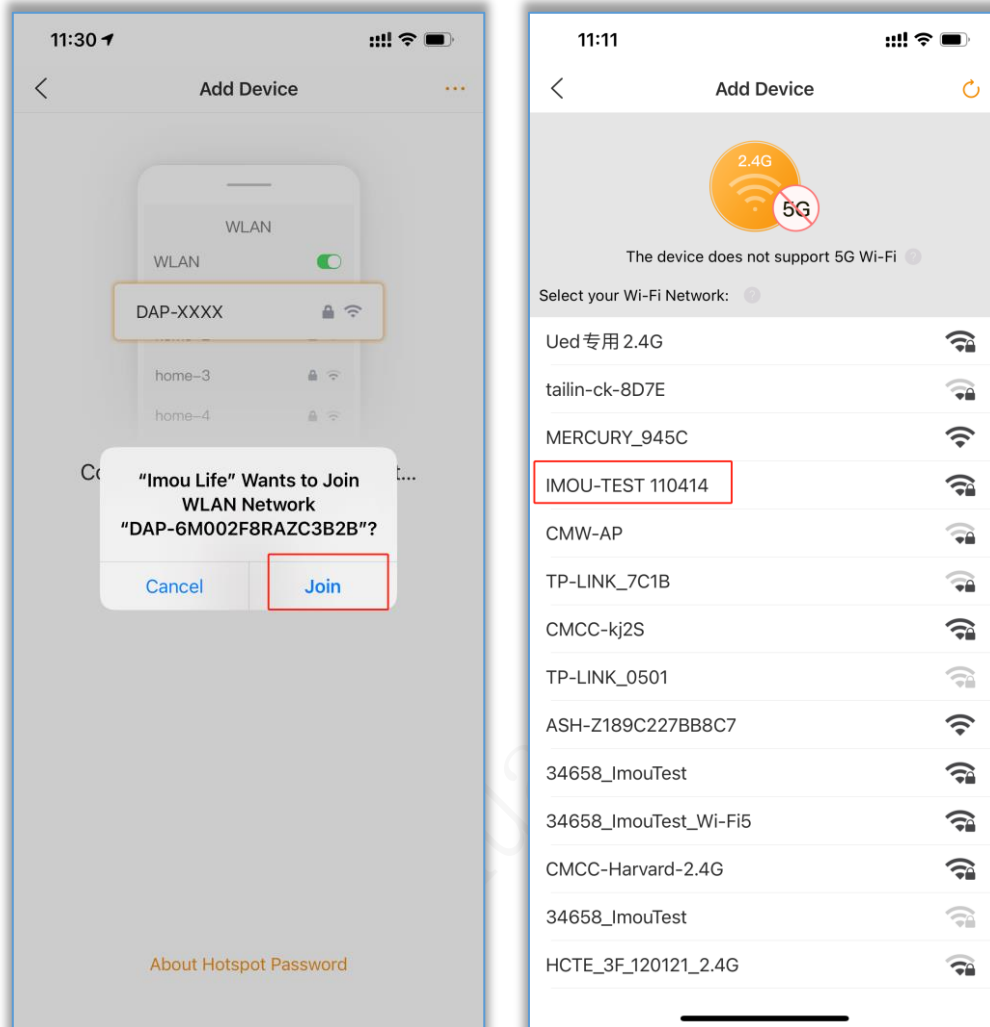

1, launch imou life app and click “+”, tap “scan QR code”, refer below pictures.

2, confirm the device serial number, click “next” and make sure the device indicator is flashing in Green slowly.

3, follow the hint and connect your cell phone to the device wifi hotspot (DAP-xxxxxxxxxxxxxx), then Imou life App will search all wifi signals around this camera, please select your home wifi signal.

4, enter your wifi password, and click “next”, then this camera will connect to imou cloud, finally bind to your imou account.
